

Rémy BOSSU

SEISMOLOGIST

Tel.: (33) 01 69 26 78 14

Fax: (33) 01 69 26 70 00

Email : remy.bossu@cea.fr

2002 Secretary General of the European-Mediterranean Seismological Centre (EMSC)

The EMSC is a non-profit NGO. In 2005, it comprises 75 seismological institutes as members from 49 countries. Its scientific activities are related to seismic hazard and earthquake monitoring (alert system and Euro-Med seismological bulletin) and it promotes research and collaboration within the region. It plays a key federative role at the European and Mediterranean level.

Research project initiation, definition and management (EC); Fund raising. International cooperation (involved in GMES and GEOSS); Evaluation of seismic monitoring capacities and implementation of data exchanges.

1999 Seismologist at the Laboratory for Seismic and Geophysical Risks (LDG / CEA, France)

Seismic hazard assessment; site effects and earthquake monitoring.

1998-1999 Seismologist at the Institute for Nuclear Safety (France)

Site effects; historical seismicity.

1996-1998 Seismologist at the Applied Seismology and Rock Physics lab. (Keele Univ, U.-K.)

Microseismicity and fracturation of the Ekofisk reservoir

1992-1996 Lecturer in applied Physics at the Grenoble University.

Education

1996 PhD in Seismology. Intraplate seismicity in the Gazli Region (Uzbekistan)

Supervisor: J.-R. Grasso, University of Grenoble

1992 D.E.A (Master) in Seismology at the University of Grenoble

1991 Degree in Physics (one year in The University of Sussex, U.-K)
